# Berrico

**B>**

“Berrico” was one of the first freehold lots in the Gloucester District (NSW Mid North Coast) having been granted in 1861. The property was purchased by Geoff & Lynn Slack in 1987 from descendants of the original grantee. Since 1987 the property has been expanded by acquisition of neighbouring properties and substantial improvements have been carried out.

The Slacks became interested in F1 cattle many years ago after growing out cattle for the Grafton Research Station cross breeding trials conducted by Helen Hearnshaw. The base of the cross breeding herd at “Berrico” started with Hereford females using “Tartus” and “Lancefield” Brahman bulls resulting in Brahman/ Hereford F1s. Charolais bulls were then used as the terminal sires to produce the top quality calves presented at the “Berrico” sales.

A back injury to Geoff in 1996 prompted a change in operations and since then replacement females have been sourced from various studs.

For the past six years the Slacks have been the major purchaser of “Bizzy” Brahman Stud Brahman/Angus F1 Females at the Grafton Bos Indicus Sale.

To complement the females, Charolais bulls have been purchased from Michael and Jenny Millner, “Rosedale” Blayney, each year since 1993 to produce top quality cross bred calves.

Every precaution has been taken to establish accuracy of the above information but does not constitute any representation by the vendor or agent.
